S21	0	In operation of the compressor, additional oil may be introduced at the air intake, possibly in the form of a "spray." The total volume of oil may be increased to the desired degree to assist in carrying away some of the heat produced since no provision is made for interstage "cooling." A suitable oil return passage (not shown) is provided to return oil collecting inside rear pan "220" to the interior of compartment "160" for readmission into the first stage	US-PGPUB; USPAT	AND	OFF	2008/09/23 15:52
S22	0	In operation of the compressor additional oil may be introduced at the air intake	US-PGPUB; USPAT	SAME	OFF	2008/09/23 15:52
